Statement of Vision and Interest

Over my years in dental practice, PBC has always been an insurance/benefits provider that I've favoured. This is because they have provided some of the best benefits for my patients and have also been one of the best carriers to deal with from a provider's standpoint. I also respect the fact that PBC is non-profit organization which, from its inception, was created to benefit the working people of BC. My vision for PBC is to have it carry on this tradition but also to improve upon it by offering a potentially broader range of dental services for beneficiaries. I would also like to see it work even better with service providers so that they are also strong supporters of the organization. In this way, my hope is that PBC can maintain and improve its market share despite some of the current challenges that face the industry. I am interested in serving as a Director for PBC because I feel my clinical and business experience can help guide the board in the area of dental benefits. There are potential areas where benefits could be expanded without great cost. These areas would make benefits packages more appealing. Also, there are some areas of potential savings in little used services and in some potentially misused services. In addition, I will be able to counsel the Board on the clinical consequences of changing benefits. Furthermore, I hope I will be able to give direction regarding working with service providers, so they and their staff become fervent supporters of PBC packages. It is through the positive experiences of both beneficiaries and providers that the aim of further success for PBC will be attainable.
